Acknowledgements

We are grateful to the Government of Uttar Pradesh for providing financial support to the Institute for preparation of this document. The basic tasks of personally contacting different agencies and institutions and consulting the data source from their libraries were carried out by Sri V. K. Goel, Sri Ravi Rai, Sri Dinesh Singh, Sri H. S. Tewari, Miss Rubi Ojha, and quite a few others. We acknowledge with appreciation the contribution made by them and are thankful to Sri D. K. Bajpai for carrying out considerable portion of the editing work. Our thanks to Sri Devanand who typed the manuscript of this document. Lastly, we are grateful to the officials and individuals at different organisations for making available the data source materials.

To The Users

It is hoped that this document would be found useful in locating source of data which the research workers, teachers, planners, administrators and others may need in the course of their work. Since it is the first attempt of its kind the coverage of our exercise could inevitably be incomplete. Any suggestions for inclusion of any useful source material as well as for improvement in the format of the presentation of information in this document are welcome. They would be incorporated in any subsequent revision which may be undertaken if the response from users is found encouraging.

About the Document—A Note

Background

Information and particularly statistical data are a crucial input in the process of analysis, research and planning development of an economy. Large volumes of statistics are, therefore, collected and compiled every year by Government and non-government institutions and individuals for these purposes. While some of statistics gets published regularly or occasionally, a large part of it remains obscure. Generally the usefulness of a set of data is far beyond the particular purpose for which it is collected. But often it becomes difficult to identify the nature and sources of data existing at a point of time. It is, therefore, desirable to have a record of such data materials for use of the policy makers, planners and researchers.

In Uttar Pradesh, as elsewhere, data are collected within the large governmental system by various departments and agencies in an uncoordinated manner. A similar large volume of information gets collected by non-governmental institutions and individual researchers on diverse aspects of the economy and society in different and dispersed locations. Many a time one finds it practically impossible to recollect or locate the required information. Fresh data is, thereby collected even though similar data might be available some where. Therefore, with a view to economising on time and financial cost of collection and organisation of data, it is desirable that the available stocks of data are utilised to their utmost extent, and lead is taken from them in collecting fresh data. A need was, therefore, felt to systematically record the sources and nature of data relating to the economy of Uttar Pradesh and its sub-entities. The present document was prepared in this background with financial support from the Government of Uttar Pradesh.

Coverage

The document covers such of the reports and publications which provided original data or estimates for the economy of the State and its parts. For this purpose relevant information was collected from various source materials available with the State Government agencies, universities and research institutions. Attempt was made to contact almost all the Government agencies located in Lucknow and Kanpur. The list of universities and research institutions contacted during the course is presented below.

1. Agro-Economic Research Centre, Allahabad University, Allahabad
2. Agro-Economic Research Centre, Delhi University, Delhi
3. Allahabad University, Allahabad

4. C. S. Azad University of Agriculture and Technology, Kanpur
5. G. B. Pant Institute of Social Science, Allahabad
6. Gorakhpur University, Gorakhpur
7. Indian Council of Social Science Research, New Delhi
8. Indian Institute of Technology, Kanpur
9. Kanpur University, Kanpur
10. Kumaun University, Nainital
11. Lucknow University, Lucknow
12. Meerut University, Meerut

It may be pointed out that, given the time and resource constraints, efforts were made to locate and report about as many useful materials as possible. In all 329 source materials are listed in this document including 20 Census volumes. While most of the published official data seems to have been covered, it is felt that a substantial amount of work still needs to be done. Even with the Government agencies bulk of useful data remains unorganised or unpublished and therefore very much underutilised. In the present context it has not been possible to explore into the nature and availability of such data. Moreover, it has also not been possible to make an extensive survey of the materials available with educational and research institutions.

Presentation

The document provides information regarding the source materials, i. e. reports and publications, as well as the nature, scope and reference period of the data contained in them. The source materials have been specified individually except for the Census volumes; as Census reports are very well documented and people generally know about the Census data, giving details about individual Census volumes would have consumed too much space rather unnecessarily to make this document somewhat unbalanced. Further, while Census volumes of 1961 and 1971 have been covered and reported in groups at Sl. Nos. 1.1 (a) and 1.1 (b), no specific attention has been paid to the 1981 Census volumes, as only a few of these were published by the date (March 1985) upto which information for this document was collected. The source materials have been classified thematically in accordance with the data related aspects as would be evident from the CONTENTS. There are sixteen sections in the document focussing at the various aspects of the economy. The titles of the first fifteen sections are self-explanatory. The last section 'General' refers to the materials which provide multifarious data on various aspects of the State's or regional economies. The pieces of information reported against each of the source materials are listed below and explained wherever necessary.

Column No.

Item

- | | |
|---|---|
| 0 | Sl. Nos. of the Sections in Roman numerals I to XVI and sectionwise Sl. Nos. of the source materials, such as 1.1, 2.5, 6.31 and 12.10, where the number on the left side of the point is the Sl. No. of the Section and that on the right side is the Sl. No. of the material within that section |
| 1 | <i>Section/Title of the Source</i> : The sections are defined by nature of the data. While many source materials provide data on more than one aspect of the economy, they have been classified in different sections in accordance with their central themes. Title of the source means the title of the report or publication |

2 *Nature of the Source :*

OR : Official Report; *UR :* Unofficial Report
Prt : Printed *Mimeo :* Mimeographed
Book; Ph. D. Thesis; M. A. Thesis

3 *Author ;* In case the authorship is not with an individual, the name of the particular agency has been mentioned

4 *Publisher :* In cases of Government publications, the publisher is either the Government of India or Controller of Publications, Government of India, or the Government of Uttar Pradesh. Among the non-commercial publishers are also the Universities and research institutions

5 *Year of Publication :*

6 *Items of Data :* A brief description of aspects on which data is available

7 *Data Source :*

Primary : The data has been collected from a survey

Secondary : Data published somewhere else has also been reported or used

Administrative : Data available with Government agencies, though not published, has been reported or used

8 *Method of Collection, if primary :*

Census : Data is based on Census of an area

Sample : Data is based on a Sample Survey

Census and Sample : The data is partly based on sample and partly on Census

9 *Coverage of Data-Geographical :*

Areas represented by the Data

10 *Coverage of Data-Period :*

Time intervals, e. g. decadal or annual, in case a source material is published periodically, and reference year of the data e. g. 1965-66, in case of *ad hoc* publications
